DETAILED ACTION

1. Claims 3, 6-23 are presented for consideration.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 3, drawn to interaction in a client/server environment for processing data information, classified in class 709, subclass 203.
 - II. Claims 6-23, drawn to ruled-based evaluation, classified in class 706, subclass 47.
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I describes steps of server providing information to client according to demographic information. The subcombination has separate utility such as evaluating data to perform action according to rules clauses in a rules-based system.

Art Unit: 2154

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
